RESPONSE

In response to the action mailed September 9, 2002, please amend claims 1-3 as follows:

B1  
SUB  
C1

--1. An electroluminescence ("EL") display device comprising a substrate on which an EL element is formed, a cover member, a filler for adhering said substrate on which the EL element is formed to said cover member, a sealing member for covering a side surface of said filler, and a frame member adhered with said sealing member.

2. An electroluminescence ("EL") display device comprising an active matrix substrate on which a thin film transistor ("TFT") and an EL element electrically connected with the TFT are formed, a cover member, a filler for adhering said active matrix substrate to said cover member, a sealing member for covering a side surface of said filler, and a frame member adhered with said sealing member.

3. An electroluminescence ("EL") display device comprising a substrate on which an EL element composed of an anode arranged in a stripe, a cathode arranged in a stripe so as to be perpendicular to said anode, and an EL layer formed between said anode and said cathode, a cover member, a filler for adhering said substrate on which the EL element is formed to said cover member, a sealing member for covering a side surface of said filler, and a frame member adhered with said sealing member.--
